Perimeter \& Area of the Four Basic Parallelograms of Plane Euclidean Geometry.
All answers for Perimeter and Area must have the correct labels.
Values inside or on Parallelograms are Heights. Which Height is actually outside a Parallelograms.

|  |  |  |  |
| :---: | :---: | :---: | :---: |
| $\begin{gathered} \text { Square } \\ \text { Perimeter }=\mathbf{S}+\mathbf{S}+\mathbf{S}+\mathbf{S} \\ \mathbf{P}= \end{gathered}$ | $\begin{gathered} \text { Rectangle } \\ \text { Perimeter }=\mathbf{W}+\mathbf{L}+\mathbf{W}+\mathbf{L} \\ \mathbf{P}= \end{gathered}$ | $\begin{gathered} \text { Rhombus } \\ \text { Perimeter }=\mathbf{S}+\mathbf{S}+\mathbf{S}+\mathbf{S} \\ \mathbf{P}= \end{gathered}$ | $\begin{gathered} \text { Rhomboid } \\ \text { Perimeter }=\mathbf{W}+\mathbf{L}+\mathbf{W}+\mathbf{L} \\ \mathbf{P}= \end{gathered}$ |
| $\begin{aligned} & \text { Area }=S \times S \text { or } S^{2} \\ & \text { Area }= \end{aligned}$ | $\text { Area }=\mathbf{L} \times \mathbf{W}$ <br> Area $=$ $\qquad$ | $\text { Area }=\mathbf{B} * \mathbf{H}$ <br> Area $=$ $\qquad$ | $\text { Area }=\mathbf{B} * \mathbf{H}$ <br> Area = $\qquad$ |

Perimeter \& Area of the Four Basic Parallelograms of Plane Euclidean Geometry.
All answers for Perimeter and Area must have the correct labels.
Values inside the Triangles are the Heights. Which Height is actually outside a Triangle.

| $\text { Sides }=3 \mathrm{ft} \quad \mathrm{H}=2 \mathrm{ft}$ | $\text { Sides }=5 \mathrm{ft} \mathrm{~B}=3 \mathrm{ft} \mathrm{H}=4 \mathrm{ft}$ | $\mathrm{S} 1=3 \mathrm{ft} \quad \mathrm{~S} 2=5 \mathrm{ft} \quad \mathrm{~S} 3=7 \mathrm{ft}$ |
| :---: | :---: | :---: |
| $\begin{gathered} \text { Equilateral } \\ \text { Perimeter }=\mathbf{S}+\mathbf{S}+\mathbf{S} \\ \mathbf{P}= \end{gathered}$ | Isosceles $\text { Perimeter }=\mathbf{S}+\mathbf{B}+\mathbf{S}$ $\mathbf{P}=$ $\qquad$ | Scalene Perimeter = S1+S2+S3 $\mathbf{P}=$ $\qquad$ |
| $\text { Area }=1 / 2 \mathrm{~B} \times \mathrm{H}$ <br> Area $=$ $\qquad$ | $\text { Area }=1 / 2 \mathrm{~B} \times \mathrm{H}$ <br> Area $=$ $\qquad$ | $\text { Area }=1 / 2 \mathrm{~B} \times \mathrm{H}$ $\text { Area }=$ $\qquad$ |
