

## Unit 5 Integration WWW Site Explorations

**Special Bonus Sites from Previous Units** \* WWW sites are useful for teachers, along with their students, to promote using 21<sup>st</sup> Century Internet presentation skills!

Online WWW assignments are due on the last day of the assigned week:

Reflections on web sites are to be submitted via eCollege course drop box as attachments!

WWW investigations of Integration sites should supplement lecture and reading content.

Investigation comments must be on initial site content & on a web site off the initial site!

In each chapter, Integration sites are provided for preview then detailed investigation.

***After previewing both categories select only 2 sites to be summarized & submitted.***

**Submission** of Integration sites: Create a MS Word page with paragraphs of 8 - 10 sentences, one paragraph for each of the two sites that has been selected from below to be submitted.

Carefully describe significant content for both investigated sites, include WWW site name.

Do not submit a bad review of a site! It only shows you did not consider all of the sites!

Think of future students while completing this assignment and integrating technology!

Save summary for resubmission, maybe use USB drive and check spelling & grammar!

**Required Title for Assignment: Unit 5 Integration WWW Sites \* First & Last Name**
