

Special Angles for Parallel Lines – Page A

Note: There are only (2) angles measures!

There are (5) Pairs of Angles associated with Parallel Lines **and** a Transversal Line!
 Select any angle and compare it to the given angles! **Note** All are either = to A or B!
 Select any two angles: Identify, Estimate Degrees, Measure Degrees with Protractor!
 Comment on whether the Measurement with Protractor verifies Angle Properties!

Supplementary Angles: Estimate = _____ Measurement = _____

Vertical Angles: Estimate = _____ Measurement = _____

Corresponding Angles: Estimate = _____ Measurement = _____

Alternate Interior Angles: Estimate = _____ Measurement = _____

Alternate Exterior Angles: Estimate = _____ Measurement = _____
